

Listing of Claims:

1. (Currently Amended) A connection piece for a fuel pump ~~having, comprising:~~
a receiving device; and
~~in which~~ a plug is arranged in the receiving device, the plug having which
has electrical contacts for connecting an electric motor of the fuel pump to a mains
supply and an integrally formed, circumferential sealing lip which seals the plug
against the receiving device when fuel is conveyed through the fuel pump, the plug
being extrusion-coated with plastic. ~~[[,]] characterized in that the plug (7) has an~~
integrally formed, circumferential sealing lip (17) [[.]]
2. (Currently Amended) The connection piece as claimed in claim 1, ~~characterized in that~~
wherein the sealing lip (17) is arranged on the plug (7) in ~~the~~ a region of ~~the~~ a bushing (14) of the
electrical contacts (6).
3. (Currently Amended) The connection piece as claimed in claim 1, ~~or 2, characterized in~~
~~that~~ wherein the sealing lip (17) ~~has~~ includes a region (18) which ~~points in the direction of~~ is
oriented toward the electrical contacts (6).
4. (Currently Amended) The connection piece as claimed in claim 1, ~~at least one of the~~
~~preceding claims, characterized in that~~ wherein the sealing lip is elastically deformable, ~~can be~~
elastically deformed ~~[[.]]~~

5. (New) The connection piece as claimed in claim 2, wherein the sealing lip includes a region which is oriented toward the electrical contacts.

6. (New) The connection piece as claimed in claim 1, wherein the receiving device defines a recess, said plastic forming an edge around said conductors, said edge received in said recess, and said circumferential sealing lip surrounding said recess on an inner side of said receiving device.
